

ASAM e.V. (Association for Standardization of Automation and Measuring Systems) brings the key players in the automotive industry together to create standards for the development and testing of vehicles and driving functions. ASAM standards enable the inter-connection of tools and a seamless data exchange. We are driven by our more than 380 member companies and serve a global user community. We are looking for a

Junior Product and Technology Manager Automotive (m/f/d)

Our Product and Technology Managers are the face of ASAM in all standardization initiatives. They accompany the projects from the initial idea to the release of the first version and throughout the entire lifecycle. You will be reporting directly to our Chief Technology Officer.

Your Role

- Execute standard development projects from the initial idea to the final release
- Coordinate and moderate work groups (composed of experts from our member companies)
- Provide project-specific support and help maintain, extend, and release our existing standards
- Ensure fulfillment of our technology road map
- Select, manage, and monitor project-specific service providers
- Ensure the quality of all work results
- Engage with our members, make sure their needs are met, and help us extend our network
- Analyze and monitor technology trends with respect to their potential for standardization
- Contribute to pushing the cutting edge of the automotive industry

Your Qualification

- Bachelor or master's degree in engineering, computer science or equivalent
- Excellent communication skills in German and English (oral and written)
- Diligent, well-structured, and thorough working style
- Comfortable with working in teams as well as in self-organized settings
- Inherently motivated and fascinated by our business domain
- Open to travel (max. 20%)

Our Offer

- Competitive salary
- Flat hierarchy in a creative and visionary environment
- Combination of remote working and local presence in a great office location near Munich
- Continuous support for personal development on-the-job and with trainings
- A fascinating network of automotive professionals
