

# WE TURN EXPECTATIONS INTO SENSATIONS

In the Networked Society expectations constantly evolve, so does the definition of great user experience. Managing user experience begins with understanding the performance requirements for each type of service to ultimately turn customers into true net promoters.

Ericsson is one of the leading providers of Information and Communication Technology (ICT) to service providers, with about 40% of the world's mobile traffic carried through our networks. We enable the full value of connectivity by creating game-changing technology and services that are easy to use, adopt and scale, making our customers successful in a fully connected world. For more than 140 years, our ideas, technology and people have changed the world: real turning points that have transformed lives, industries and society as a whole. As Digital Service Providers, operators enable the digital economy and this means that you should also operate according to this shift. Ericsson enhances the way service providers digitally engage with their customers. Entirely automate operations and create the levels of programmability, access and agility that digital natives call home.

## INTEGRATION ENGINEER DEVICE VERIFICATION (F/M)

REQ. ID 249672
