

Wir.
Embedded.
Maßanzug.

Since 1993 we design and manufacture „electronic mass suits“ for a broad variety of industrial applications (renewable Energies, Automotive, manufacturing Equipment). Our engineering stuff covers a wide range of modern technologies from software-, hardware-design, mechanical-design and the manufacturing process.

To enforce our team we search You as:

Circuit Designer / Layout Designer (m/f)

Your tasks:

- ✓ Circuit-design / Simulation / Evaluation / Climatic Tests / EMC Tests
- ✓ Optimizing (Power / EMC / Manufacturability)
- ✓ PCB-design using Altium Designer
- ✓ 3D-PCB-design to address complex mechatronics designs (Altium / SolidEdge)
- ✓ Administration of the MIS-Parts-Library
- ✓ Competence Center Circuit Design
- ✓ Competence Center Layout / SMT- Production Technology

Your Profile:

- ✓ „Solution-Finder“ due to creative circuit-design and interdisciplinary development
- ✓ Pleasure for optimizing & fiddle out (Circuits, Layout, Mechatronics)
- ✓ Versatile interests in (Analog- / Digital- / Bus-systems / High-speed signals / Power / CPU)
- ✓ Experience in PCB-Design
- ✓ Used to work fully autonomously
- ✓ Social Competence and team ability
- ✓ Good Knowledge in English and German language

We offer:

- ✓ Perfectly equipped working space (Measurement tools / CAD)
- ✓ Your chance to show up your skills and own writing in our high tech projects
- ✓ Sustained industrial projects at highest engineering levels
- ✓ very good working climate in a powerful team
- ✓ permanent contract
- ✓ a good job with opportunities in a rock solid owner-managed company

Your skills are most important to us – more than any testimony!

We do give a good chance to newcomers and nerds. If you are ready for the challenge take your chance and send your application documents via e-mail to : job@mibtec.de
