ROHM Semiconductor is one of the major global semiconductor companies with over 20.000 employees. We design and produce a very wide range of electronic components, from ICS (ASIC, ASSP) to discretes, optoelectronics and passives. Our product range also comprises thermal printheads and contact image sensors. ROHM is a leading company in the field of Silicon Carbide (SiC). ROHM in Europe has been established 40 years ago in Willich (close to Düsseldorf), Germany. We serve the European market with our sales forces located in 11 offices and the European Design Center.
