Diplominformatiker(in) (Dipl.-Inf.) / Master of Science (M.Sc.): Innovation Researcher – Project Management (m/w) – Blieskastel

Description

The innovation department of the HagerGroup is participating actively in research activities with the focus of energy management, smart home applications and ambient assisted living. These research activities have the goal to develop innovative products from a design concept to a final product. This development is supported by a research community which bundles expertise to develop products beyond the current portfolio. The HagerGroup is searching for a talented software developer with a strong research background to manage and participate in research projects.

Requirements

The HagerGroup is searching for a computer scientist with a strong background in the research domain. A university degree on the level of a M.Sc. or similar is required. Knowledge in Java or C++ Programming, Linux operating systems and Bash Scripting are mandatory. Expertise in with Time Series Databases (InfluxDB) and Data Visualization Tools (Grafana) are considered a plus. The candidate requires project management skills and strong competencies in technical reporting for research projects. Communication skills in English and German in written and spoken form are mandatory. Analytical competence, creativity and a strong interest in the provided topics is also of crucial importance. The position is initially limited to a 3 year contract. If that is what you are looking for then the Hager Group offers you an attractive workplace in Blieskastel as part of an international innovation team. If you want to contribute to the technology of tomorrow- join us:
